PROFESSIONAL SUMMARY

IT graduate (BSIT, July 2026) with hands-on software development experience building a full-stack rental management system deployed for a live business client. Skilled in PHP, JavaScript, MySQL, and Tailwind CSS, with a strong foundation in UI/UX design and version control. Comfortable working across the full stack, from database design to responsive front-end interfaces.

WORK EXPERIENCE

Software Developer (OJT → Regular Employee)

Panrama Technologies Enterprises | February 2026 – Present

- Developed the MOMOCart rental management system as a paid engagement for a live business client, delivering a full-stack solution now in active commercial use (see Projects).
- Gathered requirements directly from the business owner and translated them into a working system covering rentals, staff attendance, and sales tracking.
- Managed the project end-to-end from design to deployment, handling ongoing support for the client's day-to-day operations.
- Transitioned to a full-time role (July 2026) maintaining the deployed system — auditing staff-entered records for typos and input errors, coordinating with branch staff to correct discrepancies, and ensuring smooth daily operations.
- Serve as the office's IT Admin, overseeing staff use of the deployed system across branches and issuing formal memos to address policy violations and ensure data accuracy.

TECHNICAL SKILLS

- **Languages & Frameworks:** HTML, CSS, JavaScript, PHP, Java, C++, Tailwind CSS
- **Databases & Tools:** MySQL, Git & GitHub, AJAX, Chart.js
- **UI/UX Design:** Figma, Canva, Prototyping, Wireframing, User Research, Responsive Design
- **IT Fundamentals:** Basic Networking, LAN Setup & Configuration, Cisco Packet Tracer, Computer Troubleshooting

PROJECTS

MOMO Cart: QR Rental, Attendance & Sales System — Paid Client Project

- Built and deployed a centralized digital logbook system for a mobility cart rental business, replacing manual logs and cash counting across 6 active branches.
- Developed QR-code-based cart registration with printable QR labels, selfie-verified staff attendance, and real-time AJAX logbook updates with no page reloads.
- Implemented role-based staff accounts, a centralized admin dashboard, and CSV/Excel/PDF export for attendance and sales reporting.
- Designed in Figma and built with PHP and MySQL, deployed on Hostinger; live and in active commercial use since May 2026.

Plotease: Faculty, Room & Section Scheduling System — Capstone Project

- Served as UI/UX Designer on a team system that auto-generates conflict-free faculty, room, and section schedules; led research, wireframing, and Figma-to-code handoff.

VenOS: Point-of-Sale for One-Counter Shops — Personal Project

- Built a full-stack POS system for small single-counter businesses with fast checkout, live sales dashboard, and PIN-protected access; deployed with a live demo.

EDUCATION

Bachelor of Science in Information Technology

Bulacan Agricultural State College, San Ildefonso, Bulacan | Graduated July 2026
